

How to recycle

SORTING GUIDE ENGLISH ENGELSK

NIR makes it possible for you to dispose of your waste in an environmentally friendly manner. By sorting your waste correctly it becomes a resource that can be reused. YOU can help us do it!

All households must pay a waste disposal fee. The fee includes roadside collection of household waste.

There is collection schedules for general household waste, paper and plastic packaging. Some municipalities also collect food waste and glass and metal packaging – check your local collection calendar. On collection days waste must be ready for pickup at 06:00.

There are also unmanned collection points where all households can deliver sorted waste. Here you will find containers for textiles, and glass and metal packaging.

At staffed recycling stations you can deliver all types of waste during opening hours.

Collection days and local station hours can be found on NIR's website – you will find your municipality in the menu.
